

PINKNOISE PAPILLON LEFTOVER CATERADIO

Over the past years a lot of attempts where made to start and maintain a politically oriented online radio (and television!) station.

Broadcasting evictions, reporting on actions and demonstrations, discussions, infotalks and more. Music has been important in these projects. Many hours of experimental and less experimental live and dj sets have been broadcasted.

Another important part is the fact that we try to DIY everything, we use open source software and try to create a setup that can be used by other people as well.

Lastly, it is also a social project. Having a nice time with friends during a broadcast is as important as the actual program.

There is a lot of roles in a project like this. Web developers, linux techies, musicians, reporters, graphic designers, discussion hosts, MC`s.

If you are interested in collaborating, we would like to invite you to our meeting on wednesday the 29th in JLAG(at 20:00 (Eerste schinkelstraat 14-16 Amsterdam)
