

## Amsterdam Street Medic Collective

We are a collective working on providing basic medical care and resources to the community. Our goal is to make the streets a safer place to live, party, and protest; through teamwork, support, and education.

The next Street Medic training sessions will be held on 3 consecutive **Sundays** in **January**, the **5, 12, and 19**, from **11-6**. Attendance for all 3 days (20+ hours) is mandatory. These training sessions will be free and we will provide a handbook and training materials. We have limited spaces so please let us know by email as soon as possible if you are interested.
